“Get recognition of your work experience and obtain a formal qualification”

BIG Discounts on Offer

In these uncertain times it pays to have a formal qualification that gives you the edge with a job promotion or new career. We know how time poor everyone is but look at the benefits on completion. This could lead to a university placement, career promotion, job change or simply the reward and recognition that you deserve!

ANIBT can assess your suitability for “Recognition of Prior Learning” (RPL), by assessing your skills and attributes from your present and previous occupations.

For a free assessment, contact us now and speak with our highly qualified RPL Coordinator to guide you through the RPL process.

Please look at our courses guides to identify which qualification you would like to choose that would suit your background:

For the month of August, as a further incentive we will be offering up to 75% off the price of completing a full qualification. This means it is right time for you to get that qualification you deserve!! Contact us now on (03) 9620 2922 or email: info@anibt.vic.edu.au

Gap assessment for unqualified Refrigeration and Air-conditioning mechanics and electrical trade people

ANIBT is one of only a few providers in Australia that successfully trains, experienced yet unqualified Refrigeration and Air-conditioning mechanics and off-shore trade recognised mechanics with a UEE31307 Certificate III in Refrigeration and Air Conditioning.

This process will:

- Evidence gather your prior learning
- Match your skills to skills required
- Train you in all areas where gaps of competencies are evident
- Train and assist you in gaining all necessary licenses and compliance identification such as:
  - D – licence for Refrigeration and Air-conditioning
  - Apply first aid certificate
  - White card – O.H & S
  - ARC licence
  - Work place experience evidence

Our GAP assessors are highly trained in the process of training and assessing you to meet industry standards.

As everyone’s experience and previous overseas industry knowledge will vary, so our training has to be individualised.

Please contact ANIBT’s Huntingdale Trades Campus for a confidential discussion on how we can help you: (03) 9543 1033.
