Course overview

This qualification reflects the roles of individuals delivering training and assessment services in the vocational education and training (VET) sector. In broad terms, the qualification presented in TAE10 Training and Education Training Package reflect the view that training delivered in the VET environment is in fact a component of the wider educational delivery footprint.

In addition, while the market for qualifications in the training package versions that preceded this Training Package tended towards delivery in a workplace context, the evolution of the package reflects recognition that the delivery of training and education in a VET context requires wider and more diverse skills, knowledge and competence.

In conjunction with this, is the growing understanding that career pathways in the VET sector also involve management and leadership as well as market development, and in particular for Australian enterprises, the export market.

Achievement of this qualification or an equivalent by trainers and assessors is a requirement of the Australian Quality Training Framework Essential Standards for Registration (Standard 1 as outlined in Appendix 2 of the Users’ Guide to the Essential Standards for Registration).

This qualification, or the skill sets derived from units of competency within it, is also suitable preparation for those engaged in the delivery of training and assessment of competence in a workplace context, as a component of a structured VET program.
